

Amith B

Full Stack Software Engineer | Go · React · Java · NodeJS

Bangalore, India | +91-9742753491 | amithbr6@gmail.com | linkedin.com/in/amith-b-sagar | github.com/Amith-B | amith-b.github.io

PROFESSIONAL SUMMARY

Full Stack Software Engineer with **7+ years** of experience architecting, building, and scaling high-performance web applications and distributed microservices. Specialized in **Go (Golang)**, **TypeScript**, **React**, **Node.js** and **Java**, with a demonstrated track record in enterprise design systems, and frontend performance tuning. Proficient in monorepo architectures, robust API development and cloud environments like AWS.

TECHNICAL SKILLS

Languages: Go (Golang), TypeScript, JavaScript, Java, SQL, HTML5, CSS3/SCSS

Frontend: React.js, Redux, Angular (2+), NgRx, RxJS, SolidJS, Next.js, Material UI

Backend & Microservices: Go (Echo, Goroutines, Channels), Node.js, Express.js, RESTful APIs, JWT

Cloud & DevOps: AWS (IAM, STS, S3, SQS), Docker, Kubernetes, CI/CD

Databases & Storage: MongoDB, MySQL, Redis

Tooling & Architecture: Monorepo (Nx), Storybook, Webpack, Vite, Git, VS Code Extension API, Jest, Unit Testing

PROFESSIONAL EXPERIENCE

IBM ISL

Jan 2024 – Present

Software Development Engineer II (SDE II) – Full Stack

Bangalore, India

- Developed scalable microservices and interactive dashboards for an enterprise **cloud cost optimization platform** managing multi-cloud workloads across AWS, Azure, and GCP.
- Engineered high-throughput, concurrent RESTful APIs using **Go (Echo framework)** and Goroutines, incorporating authentication and rate limiting to support heavy traffic and faster response.
- Optimized frontend architecture and state management in **React (Redux)**, slashing UI page load and rendering latency by **75%** by refactoring legacy code.
- Built and maintained mission-critical cloud credential management workflows using AWS.
- Designed accessible, modular UI components utilizing **Material UI** and TypeScript adhering to accessibility standards, accelerating cross-team feature delivery.
- Enhanced backend microservices in **Go** and **Java**.

GeekyAnts

Dec 2021 – Jan 2024

Software Engineer III – Full Stack

Bangalore, India

- Developed an enterprise cross-framework design system (**React, Angular, TypeScript**) featuring 20+ reusable, accessible UI components adopted across multiple client apps.
- Configured a **monorepo architecture using Nx** and **Storybook**.
- Built custom developer tooling, including internal **VS Code extensions** for code scaffolding and snippet automation, boosting developer productivity and onboarding speed for engineers.
- Partnered closely with UX designers and product leadership to translate complex requirements into responsive, production-ready interfaces with pixel-perfect fidelity.

Wipro Technologies

Jun 2019 – Dec 2021

Project Engineer – Full Stack Developer

Bangalore, India

- Developed and maintained scalable enterprise single-page applications (SPAs) using **Angular (2+)**, TypeScript, and Angular Material with an emphasis on performance and maintainability.
- Implemented unidirectional, predictable state management using **NgRx (Effects, Reducers, Selectors)**.
- Designed real-time interactive data visualization dashboards leveraging **RxJS observables** and chart libraries for high-frequency telemetry.
- Engineered backend REST endpoints and business logic using **Node.js** and **Express**.

EDUCATION

East West Institute of Technology, Bangalore, India

2015 – 2019

Bachelor of Engineering in Computer Science and Engineering
