

Amith B

Full Stack Software Engineer | 7+ Years Experience | Go (Golang) | React | Cloud | AI

Bengaluru, India | +91-9742753491 | amithbr6@gmail.com | linkedin.com/in/amith-b-sagar | github.com/Amith-B | amith-b.github.io

TECHNICAL SKILLS

Core Backend	Go (Golang), Echo Framework, Goroutines, Channels, Java, Node.js, Express.js, RESTful APIs, JWT
Frontend	React.js, Redux, TypeScript, Angular (2+), NgRx, RxJS, SolidJS, Next.js, Material UI, HTML5, CSS3/SCSS
Cloud & AWS	AWS (Secrets Manager, DynamoDB, Lambda, SQS, IAM, STS), Docker, Kubernetes, CI/CD
Observability & Debugging	Datadog, Splunk, Kubernetes Pod Logs
Databases & Caching	DynamoDB, MongoDB, MySQL, Redis
Architecture & Tooling	Monorepo (Nx), Storybook, Webpack, Vite, Git, VS Code Extension API, Jest, Playwright, Unit Testing

PROFESSIONAL EXPERIENCE

IBM India Software Labs (Research and Development)

Jan 2024 – Present

Software Development Engineer II (SDE II) – Full Stack

Bengaluru, India

IBM Cloudability FinOps platform for multi-cloud cost, billing, usage visibility, allocation and optimization.

- Developed scalable microservices in **Go (Echo)** and responsive interactive dashboards in **React (Redux)** for multi-cloud workloads across AWS, Azure, and GCP.
- Engineered high-throughput, concurrent RESTful APIs using **Go** and Goroutines, incorporating authentication and rate limiting to support heavy telemetry traffic and reduce response latency.
- Optimized frontend architecture and state management in **React (Redux)**, slashing UI page load and rendering latency by **75%** by refactoring legacy component hierarchies.
- Built and maintained mission-critical cloud credential management workflows leveraging **AWS Secrets Manager, Lambda** and **SQS**, with **DynamoDB** for storing metadata.
- Designed accessible, modular UI components utilizing **Material UI** and TypeScript adhering to WCAG accessibility standards, accelerating cross-team feature delivery.
- Authored unit and end-to-end test suites using **Jest** and **Playwright**, increasing frontend test coverage to **80%** and preventing release regressions across critical UI workflows.
- Enhanced backend microservices in **Go** and **Java** deployed on **Kubernetes**, actively using **Datadog, Splunk**, and **Kubernetes pod logs** to debug production issues and maintain system reliability.

GeekyAnts India Pvt Ltd

Dec 2021 – Jan 2024

Software Engineer III – Full Stack

Bengaluru, India

Enterprise cross-framework design systems, monorepo architecture, and internal developer productivity tooling.

- Developed an enterprise cross-framework design system (**React, Angular, TypeScript**) featuring 20+ reusable, accessible UI components adopted across multiple client apps.
- Configured an enterprise **monorepo architecture using Nx** and **Storybook**, modularizing shared UI libraries and optimizing distributed build caching.
- Built custom developer tooling, including internal **VS Code extensions** for code scaffolding and snippet automation, boosting developer productivity and onboarding speed for engineers.
- Partnered closely with UX designers and product leadership to translate complex requirements into responsive, production-ready interfaces with pixel-perfect fidelity.

Wipro Ltd

Jun 2019 – Dec 2021

Project Engineer – Full Stack Developer

Bengaluru, India

Enterprise single-page applications, reactive state management, and real-time analytical telemetry dashboards.

- Developed and maintained scalable enterprise single-page applications (SPAs) using **Angular (2+)**, TypeScript, and Angular Material with an emphasis on performance and maintainability.
- Implemented unidirectional, predictable state management using **NgRx (Effects, Reducers, Selectors)**, eliminating state inconsistencies across complex user flows.
- Designed real-time interactive dashboards leveraging **RxJS observables** and chart libraries for high-frequency telemetry.
- Engineered backend REST endpoints and business logic using **Node.js** and **Express**.

PROJECTS

MacNewTab – macOS-Inspired Productivity Dashboard

2024 – Present

Creator & Maintainer | github.com/Amith-B/macnewtab | Chrome Web Store

TypeScript, Manifest V3, Web APIs

Open-source macOS-styled workspace dashboard for personal productivity, tab workflows, and calendar tracking.

- Built and published an open-source productivity dashboard featuring 15+ modular widgets, Pomodoro focus studio, and local tab management.
- Engineered with a privacy-first architecture using Chrome Extension Manifest V3 background workers, Chrome Storage API, and Google Calendar OAuth sync with zero external tracking.

EDUCATION

East West Institute of Technology

2015 – 2019

Bachelor of Engineering in Computer Science and Engineering

Bengaluru, India
